

FLU SHOT UPDATE

Flu Time

On Your Mark, Get Set, Gooo!

The race against time begins Oct. 1. Will the flu vaccine get in enough arms to defend Sarasota County before the flu viruses attack?

The pharmaceutical companies have been shipping flu vaccine since mid-August to all who ordered it, including physicians. The Sarasota Flu and Pneumonia Coalition partners have scheduled hundreds of flu shot clinics for the public from Oct. 1 to Nov. 30.

Daily updates of flu shot clinic sites throughout the community will be available to you by calling the Sarasota County Health Department Flu Information Line at **941-861-2800** or by visiting the website at **www.sarasotahealth.org**

Everything is ready to help you win the race and avoid the dreaded flu. The Centers for Disease Control tell us the flu is preventable; no one over the age of six months needs to suffer or die from this very serious disease. Will you join with us to cross the finish line of protection before the disease arrives?

Our community's immunity depends on each person doing their part to form a protective shield.
